UV PROTECTION AWARENESS MONTH

Prevent Blindness organization has declared MAY as Ultraviolet (UV) Protection Awareness Month. As Summer draws near, remember that your eyes need sun protection too! UV rays can lead to cataracts, macular degeneration, and even cancer of the eyelids. Protect your vision by wearing sunglasses that block 100% of UVA and UVB rays.

Book your next comprehensive examination and ask us about what kind of eye protection is right for you and your family.
